## Weekly Green Thing!

*What do we do at home to help look after the Earth?*  
Prompt ideas: recycling, saving water, turning lights off.

**Fun Fact:** Small everyday actions really do add up. Turning off lights, recycling, and saving water at home helps reduce waste and protects the Earth's resources for the future.

### Did you know?

If everyone turned off lights when they were not needed, it would save lots of energy every day – even small switches make a big difference! If you turned off just one LED light every time you left a room for a year, you'd save about £1. But if every household in the UK did that, it would add up to tens of millions of pounds saved nationwide... just from flicking a switch!
